Re: Halby Chemical Superfund Site
1) **Site Security Implementation**
2) **Selection of Contractor**
3) **Schedule**

Dear Mr. Newman:

Attached for your information is a copy of the Drainage Area Site Security Plan and a copy of Drawing No. F-1, Security Fence. The Plan identifies 24 hour contacts in case of security problems.

This letter will confirm that yesterday we verbally identified to you that the Respondent has contracted with Republic Environmental Systems, Inc. of Bordentown, New Jersey to install the security fence. All workers at the site have received appropriate OSHA training.

Work to construct the fence will begin on Monday, 21 August 1995 and will be completed by Monday, 28 August 1995.

If you have any questions, please give me a call.

Very truly yours,

**LANGAN ENGINEERING AND
ENVIRONMENTAL SERVICES, INC.**

William F. Mercurio
